

Carbon Reduction Plan

Supplier name: GoCode Green Limited

Publication date: 19th June 2022

Commitment to achieving Net Zero

GoCodeGreen Limited is committed to achieving Net Zero emissions by 2030.

Baseline Emissions Footprint

Baseline emissions are a record of the greenhouse gases that have been produced in the past and were produced prior to the introduction of any strategies to reduce emissions. Baseline emissions are the reference point against which emissions reduction can be measured.

Baseline Year: 2021	
Additional Details relating to the Baseline Emissions calculations.	
Baseline position calculated for first year of operation May 2021 to December 2021.	
Baseline year emissions:	
EMISSIONS	TOTAL (tCO ₂ e)
Scope 1	1.16
Scope 2	2.29
Scope 3 (Included Sources)	Total: 4.14 Business Travel: 0.483 / Capital Goods 1.21 / Purchased Goods and Services 2.45 / Fuel Combustion 1.16
Total Emissions	7.59 tCO₂e

Estimated total emissions

tonnes CO₂e

7.59

Your emissions estimate is only based on the expenses and activities you provide. Missing expenses or activities would mean your full carbon footprint is not covered. Check out the [Business Carbon Calculator methodology](#) to better understand how we estimate your emissions.

Your scope overview

tonnes CO₂e

Scope 1 - Direct emissions

1.16

Scope 2 - Indirect emissions

2.29

Scope 3 - Supply chain emissions

4.14

Expense coverage (scope 3)

Great

Current Emissions Reporting

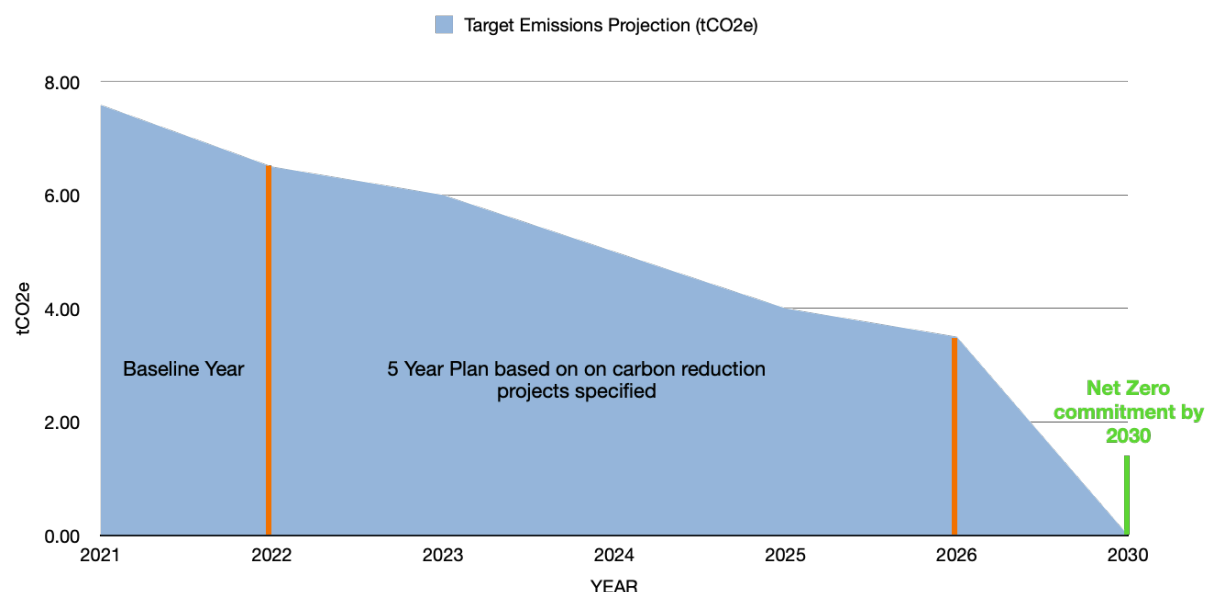

Reporting Year: 2022 - to be calculated later in year	
EMISSIONS	TOTAL (tCO ₂ e)
Scope 1	Pending assessment later in year/start 2023
Scope 2	Pending assessment later in year/start 2023
Scope 3 (Included Sources)	Pending assessment later in year/start 2023
Total Emissions	TBC

Emissions reduction targets

In order to continue our progress to achieving Net Zero, we have adopted the following carbon reduction targets.

We project that carbon emissions will decrease over the next five years to 3.5 tCO₂e by 2026. This is a reduction of 54%. As an SME and ClimateTech startup, we are on a growth trajectory and expect to be hiring more employees and expanding our business. We expect to maintain our policy of no physical office space, and minimal travel. Balancing this growth whilst maintaining the target commitment will be a challenge and we may need to revisit this to ensure that the targets are set once a critical mass of our business is in place. We however want to maintain the culture of reporting and will use the initial foundation years to ensure these are embedded and inform our decision making as we grow.

The graph below shows our current planned trajectory with all things remaining equal in our business. As previously stated this view will need to be amended.

Carbon Reduction Projects

The following environmental management measures and projects have been identified and will form the core of our carbon reduction strategy over the next 5 years:

- Reducing business travel emissions by 35% by FY2025 against a FY2021 baseline and achieve net zero in FY2026
- Procuring 100% renewable energy for our needs - including supporting employees to identify and transition to renewable energy suppliers wherever possible
- Providing GoCodeGreen teams with tools that enable them to calculate, then work to reduce the carbon emitted when carrying out client work
- Using nature-based solutions and carbon-reduction technologies to remove, or offset, more carbon than we emit from the atmosphere each year
- Requiring our 3rd party suppliers, representing 55% of our total 3rd party supplier spend, to set science-based carbon reduction targets no later than FY25

Declaration and Sign Off

This Carbon Reduction Plan has been completed in accordance with PPN 06/21 and associated guidance and reporting standard for Carbon Reduction Plans.

Emissions have been reported and recorded in accordance with the published reporting standard for Carbon Reduction Plans and the GHG Reporting Protocol corporate standard¹ and uses the appropriate Government emission conversion factors for greenhouse gas company reporting².

Scope 1 and Scope 2 emissions have been reported in accordance with SECR requirements, and the required subset of Scope 3 emissions have been reported in accordance with the published reporting standard for Carbon Reduction Plans and the Corporate Value Chain (Scope 3) Standard³.

This Carbon Reduction Plan has been reviewed and signed off by the board of directors (or equivalent management body).

Signed on behalf of the Supplier:

Eric Zie, CEO GoCodeGreen Limited
