

Carbon Reduction Plan

Supplier Name: GoCodeGreen Limited

Company Registration: 13415138

Publication Date: 20th January 2023 (updated July 2023)

Commitment to Achieving Net Zero

GoCodeGreen Limited is committed to achieving Net Zero emissions by 2030.

Baseline Emissions Footprint

Baseline emissions are a record of the greenhouse gases that have been produced in the past and were produced prior to the introduction of any strategies to reduce emissions. Baseline emissions are the reference point against which emissions reduction can be measured.

Baseline Year: 2021	
Additional Details relating to the Baseline Emissions calculations.	
Baseline position calculated for first year of operation May 2021 to December 2021.	
Baseline year emissions:	
EMISSIONS	TOTAL (tCO ₂ e)
Scope 1	1.16
Scope 2	2.29
Scope 3 (Included Sources)	Total: 4.14 Business Travel: 0.483 / Capital Goods 1.21 / Purchased Goods and Services 2.45 / Fuel Combustion 1.16
Total Emissions	7.59 tCO ₂ e

Recognised and awarded for achieving commitments by TechZero.

by Normative

Estimated total emissions

tonnes CO₂e

10.5

Country

United Kingdom of Great Britain and Northern Ireland

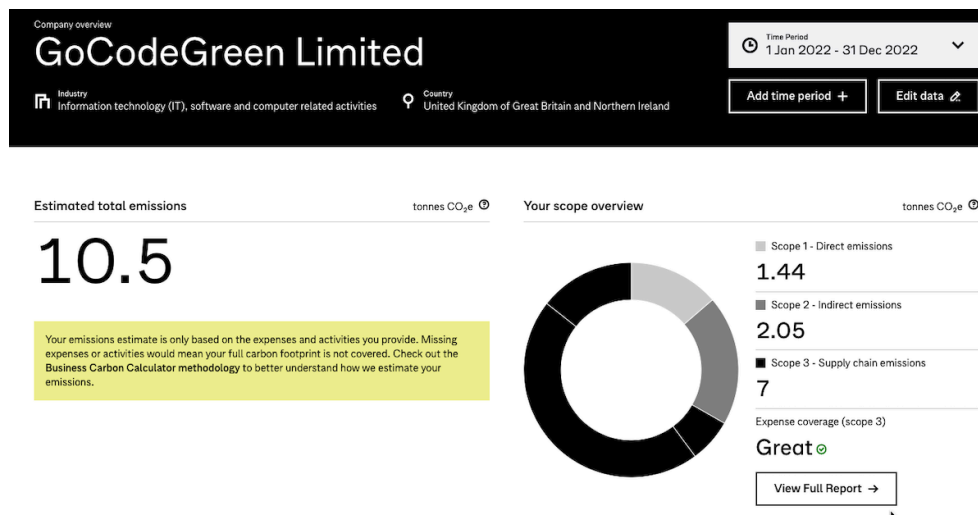

Sector

Information technology (IT), software and computer related activities

Scope 1	% of emissions	tonnes CO ₂ e
Fuel combustion	100.0 %	1.44

Scope 2	% of emissions	tonnes CO ₂ e
Electricity	100.0 %	2.05

Scope 3	% of emissions	tonnes CO ₂ e
Business travel	9.9 %	0.692
Purchased goods and services	68.6 %	4.81
Capital goods	21.5 %	1.51

Emissions reduction targets

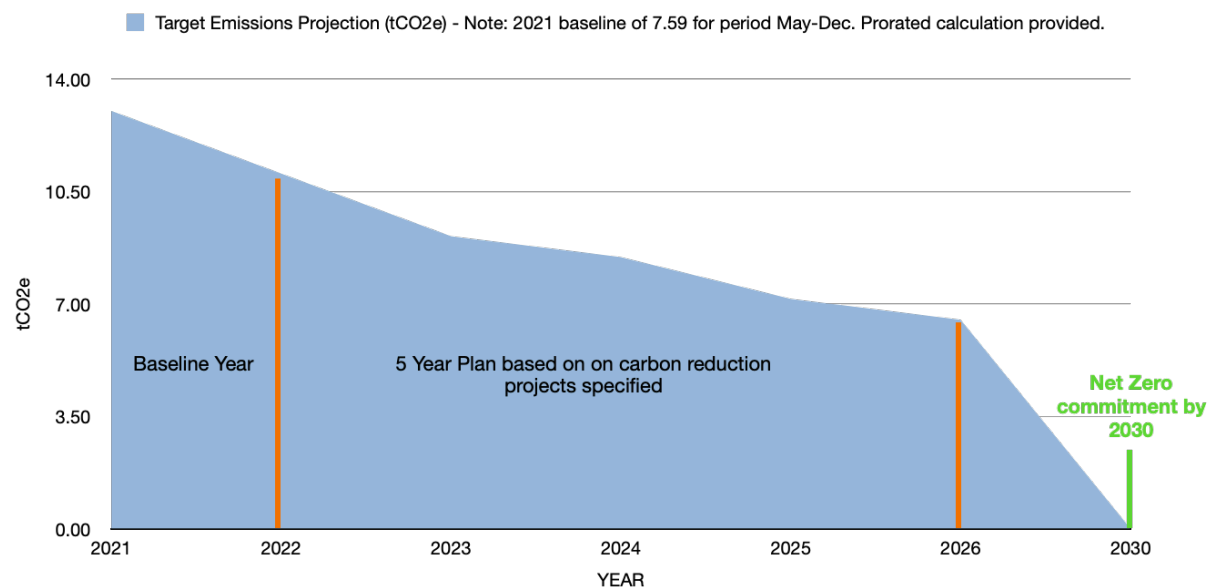

In order to continue our progress to achieving Net Zero, we have adopted the following carbon reduction targets. This view has been updated to reflect a prorated calculation per 2021 figures (original numbers based on May-Dec 2021 per our company set up in May 2021).

	2021	2022	2023	2024	2025	2026	2030
Target Emissions Projection (tCO₂e) - Note: 2021 baseline of 7.59 for period May-Dec. Prorated calculation provided.	13.01	11.06	9.11	8.46	7.16	6.51	0.00

We project that carbon emissions will decrease over the next five years to 6.5 tCO₂e by 2026. This is a reduction of 50%. As an SME and ClimateTech startup, we are on a growth trajectory and expect to be hiring more employees and expanding our business. We expect to maintain our policy of no physical office space, and minimal travel. Balancing this growth whilst maintaining the target commitment will be a challenge and we may need to revisit this to ensure that the targets are set once a critical mass of our business is in place. We however want to maintain the culture of reporting and will use the initial

foundation years to ensure these are embedded and inform our decision making as we grow.

During 2022, to compensate for our growth we took additional actions targeting our Scope 3 technology related emissions to enable us to achieve and exceed our target of 11.06 tCO₂e. The graph below shows our current planned trajectory.

Carbon Reduction Projects

The following environmental management measures and projects have been identified and will form the core of our carbon reduction strategy over the next 5 years:

- Reducing business travel emissions by 35% by FY2025 against a FY2021 baseline and achieve net zero in FY2030.
- Procuring 100% renewable energy for our needs - including supporting employees to identify and transition to renewable energy suppliers wherever possible
- Providing GoCodeGreen teams with tools that enable them to calculate, then work to reduce the carbon emitted when carrying out client work
- Using nature-based solutions and carbon-reduction technologies to remove, or offset, more carbon than we emit from the atmosphere each year
- Requiring our 3rd party suppliers, representing 55% of our total 3rd party supplier spend, to set science-based carbon reduction targets no later than FY25.
- 2022 additional action: migrate ICT hosting services to cleaner provider.

In addition to achieving our original 2022 target, as at January 2023, we are currently investigating an additional action of offset our expected 2023 emissions with to take action NOW to sequester more carbon emissions than we are creating - having a positive

impact on the ocean and the life it supports. This is NOT a claim for Net-Zero, but a decision to accelerate impact based on our culture and beliefs as an organisation.

July 2023 Update:

GoCodeGreen have been verified Climate Neutral Positive post forecasting the carbon emissions related to both our business and our core measurement platform for 2023. This involved acceptance of our actions to remove carbon emissions and verification of our carbon measurement.

Declaration and Sign Off

This Carbon Reduction Plan has been completed in accordance with PPN 06/21 and associated guidance and reporting standard for Carbon Reduction Plans.

Emissions have been reported and recorded in accordance with the published reporting standard for Carbon Reduction Plans and the GHG Reporting Protocol corporate standard¹ and uses the appropriate Government emission conversion factors for greenhouse gas company reporting².

Scope 1 and Scope 2 emissions have been reported in accordance with SECR requirements, and the required subset of Scope 3 emissions have been reported in accordance with the published reporting standard for Carbon Reduction Plans and the Corporate Value Chain (Scope 3) Standard³.

This Carbon Reduction Plan has been reviewed and signed off by the board of directors (or equivalent management body).

Signed on behalf of the Supplier:

Eric Zie, CEO GoCodeGreen Limited
